

John Ternus

Cupertino, CA | jternus@apple.com | linkedin.com/in/johnternus

Professional Summary

Hardware engineering executive with 20+ years at Apple, leading the design and development of the company's full hardware product lineup. As Senior Vice President of Hardware Engineering, responsible for the teams that have delivered iPhone, iPad, Mac, Apple Watch, AirPods, and Apple Vision Pro. Deep expertise in product design, mechanical engineering, hardware architecture, and cross-functional product development at massive scale.

Experience

Senior Vice President of Hardware Engineering

Apple Inc. | Cupertino, CA | 2021 – Present

- Lead all hardware engineering across Apple's entire product portfolio
- Member of Apple's executive leadership team, reporting directly to the CEO
- Oversee hardware design, engineering, and development for iPhone, iPad, Mac, Apple Watch, AirPods, Apple Vision Pro, and accessories
- Led hardware development of Apple Vision Pro, Apple's first spatial computing platform
- Drove Mac transition to Apple Silicon, collaborating closely with chip and software teams
- Managed engineering for redesigned MacBook Pro, iMac, and Mac Pro on Apple Silicon
- Oversee teams spanning mechanical, electrical, camera, display, sensor, and antenna engineering

Vice President of Hardware Engineering

Apple Inc. | Cupertino, CA | 2013 – 2021

- Led hardware engineering for iPad and Mac product lines
- Oversaw development of iPad Pro with M1 chip, Liquid Retina XDR display, and ProMotion
- Managed engineering for MacBook Air and MacBook Pro redesigns
- Drove engineering for iPad mini, iPad Air, and accessory ecosystem including Apple Pencil and Magic Keyboard
- Expanded hardware engineering teams and infrastructure to support accelerated product cadence

Senior Director of Hardware Engineering

Apple Inc. | Cupertino, CA | 2006 – 2013

- Led hardware engineering for multiple Mac product lines
- Oversaw development of Retina display MacBook Pro and ultra-thin MacBook Air
- Managed engineering teams through transition to unibody aluminum enclosure designs
- Contributed to thermal architecture and miniaturization innovations across the Mac lineup

Director / Senior Manager of Hardware Engineering

Apple Inc. | Cupertino, CA | 2001 – 2006

- Progressively senior engineering management roles on Mac hardware
- Contributed to development of Power Mac G5, early Intel Mac transition products, and PowerBook line
- Led mechanical and thermal engineering efforts for desktop and portable Mac systems

Education

Bachelor of Science in Mechanical Engineering

University of Pennsylvania | Philadelphia, PA

Public Appearances & Keynotes

- Regular presenter at Apple Worldwide Developers Conference (WWDC) and product launch events
 - Featured presenter for Apple Vision Pro introduction (June 2023)
 - Presenter for Apple Silicon Mac transition announcements
 - Keynote segments on iPad Pro, MacBook Pro, and iMac hardware reveals
-

Key Skills

- Hardware Product Development & Architecture
- Mechanical & Thermal Engineering
- Cross-functional Engineering Leadership
- Product Miniaturization & Material Innovation
- Display, Camera & Sensor Technology
- Large-scale Team Management (thousands of engineers)
- Product Roadmap Strategy
- Manufacturing & Design for Manufacturability
